

## Form a Team

As a team, you can make waves to fight cancer by increasing awareness and getting more swimmers to participate and raise funds. The Greenwich-Stamford Swim Across America (SAA) event supports Alliance for Cancer Gene Therapy (ACGT) in Stamford. This Swim has raised \$3.1 million for ACGT over the past 10 years.

## Team Captain Responsibilities include:

- Recruit team members & set team goal
- Promote the team internally
- Encourage team fundraising efforts
- Celebrate team's success at the Greenwich-Stamford SAA event on June 24th

## Swim Across America will provide:

- Customized fundraising ideas that work in your corporate culture
- Fundraising letter templates for the entire team
- A team kickoff at your office for information and inspiration to kick start fundraising
- Team recognition at the Greenwich-Stamford event on June 24th

## Where Your Team's Fundraising Dollars Go:

- 100% of all funds donated to ACGT from SAA go to research.
- ACGT supports cell and gene-based therapies to accelerate effective and safe treatment of all types of cancer. For more information, visit [www.acgtfoundation.org](http://www.acgtfoundation.org).
- Funds raised from the 2017 SAA Greenwich-Stamford event will support two immunotherapy researchers: Dr. Samuel Katz of Yale University for his work in blood cancers, and Dr. Crystal Mackall of Stanford University for her work in osteosarcoma.
