Dear Swim Across America Family,

In December we granted $6 million that is funding over 60 oncology projects in 2020 that otherwise might not have been funded. The breakthroughs in immunotherapy, gene therapy and new detections have given hope to so many. Many of you are participating in Swim Across America because you or your family have benefitted from the advancements in cancer treatment.

Swim Across America shares the concerns and is feeling the impact due to the COVID-19. We are following the guidelines from the CDC and local municipalities with respect to social distancing and gatherings. As such, our activities through early summer have been postponed. It is our hope to reschedule once updated CDC guidelines are issued. We will be sure to communicate once more details are known.

Cancer, though, isn’t taking a break. Donations to all our open water charity swims remain open. And registration for our summer and fall charity swims are open.

A value of Swim Across America is that money raised local stays local. All donations received for swims, will be granted this December to the beneficiary of the swim.

Thank you for Making Waves to Fight Cancer with us.

Rob Butcher
Swim Across America I CEO
